

## Clover Bag

With its unique, proprietary design, our Clover Bag gives you the benefits of a baffle style bulk bag with the ability to install a liner reducing the risk of potential contaminants from baffle material.

### Examples of Applications

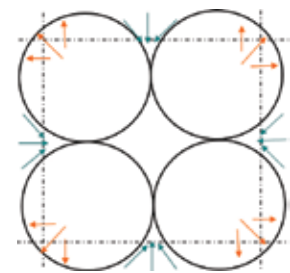

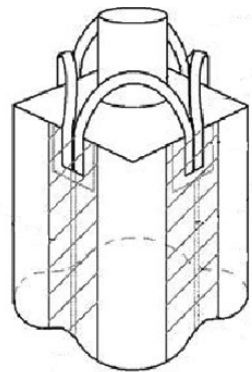

- Engineered Plastics
- Food Grade Chemicals
- SAP (Super Absorbent Polymers)
- Catalysts
- Food Ingredients
- Titanium Dioxide

### Features

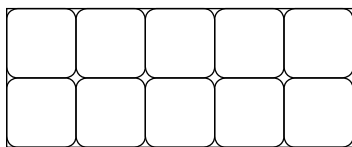

- Innovatively designed for stable stack-ability
- Able to accommodate tubular or form fitted liners
- Designed for optimal content container space
- Available in Type C and D Fabrics
- UN Certifiable

### Benefits

- Provides for balanced load
- Increases safety
- Maximizes warehouse space
- Requires less pallets
- Reduces repeated bag handlings
- Delivers logistics and freight savings through increased container capacity
- With liner, protects against moisture, foreign materials, air permeation and gas emission

MATERIAL FLOW DIRECTION

20 FT CONTAINER LOAD
