

## The FIBC Solution

Flexible Intermediate Bulk Containers (FIBCs) offer a convenient packaging method for transporting dry, flowable products typically in powder, flake or granular form. They are manufactured to meet specific user requirements and classified based on product performance characteristics.

### FIBC Application Examples

- Aggregate
- Agriculture
- Aquaculture
- Chemical
- Construction
- Fertilizer
- Food industries
- Pet food
- Resin
- Rubber

### FIBC Features

- Extremely strong, yet lightweight
- Efficient product weight ratio so bags can be folded and bailed when shipped
- Easy to store and handle with standard equipment
- Versatile enough for food/pharma grade products to hazardous materials
- Designed to optimize truck or shipping container space
- Manufactured in a variety of denier ratings
- Available lined or unlined for a wide selection of products
